

C4ISR DATA ONTOLOGY DOWNLOAD INSTRUCTIONS

C4ISR Data Ontology Posting

This document presents the steps necessary in order to obtain a copy of the C4ISR Data Ontology.

Step One: Register for an Account

Before gaining access to the C4ISR Data Ontology Package, you must register for an account on the Digitization And Interoperability Division Global Support Center Website. The purpose for this is so that SEC can manage the distribution of the C4ISR Data Ontology as well as the updates of the product that follow.

- The link to this website is as follows:

<https://rdit.army.mil/DID/menu.cfm>

This is a secure site that requires a browser with 128 bit encryption.

- Once this link is accessed, a webpage entitled “Digitization And Interoperability Division Global Support Center” comes up.
- On the lower left-hand side of the screen, within the black box under the “LOGIN” button, you will see “*Apply for Access.*” Click on this link.
- The next page that appears is the “Access Request Form.” Please fill out all required information. For the following fields, please fill them in as follows:

➤ **Systems:** Click the box that states “Ontology.”

Additional Comments: Please state your purpose for obtaining the Ontology and what program it will be supporting.

- Before submitting this form, please be sure that all user information is correct.

IMPORTANT: Since login instructions will be automatically emailed to you, please be sure that your email address is correct.

C4ISR DATA ONTOLOGY DOWNLOAD INSTRUCTIONS

Step Two: C4ISR Data Ontology Download Access

Once you have registered for an account and you receive your user name and password, you then must obtain a password that will allow you access to the C4ISR Data Ontology after it is downloaded. The following steps help you to accomplish this.

- Once the user account has been approved, a user name and the link to the download website will be emailed to the address that was given during the registration process.
- A password will then be sent in a separate email to the same email address. The user name and password are necessary to download the C4ISR Data Ontology.
- Once both emails are received, go to the URL that was sent via email.
- Once this link is accessed, the webpage entitled “Digitization And Interoperability Division Global Support Center” comes up. Click the button called “**LOGIN**” located on the left-bottom side of the window.
- Upon successful login, you will be sent back to the “Digitization And Interoperability Division Global Support Center” webpage. Click on the option called “**Order, Download, or Register Software.**”
- The next window that will appear is called “Software Download/Order Menu.” Click the button in the center of the screen that says “**Download Software.**”
- On the next screen you will see a dropdown menu called “Category.” In this drop down list select “**DID Software.**”
- Once this is done, under the title called “Sub-Categories” you will see highlighted in blue “**Ontology.**” Click on this link.
- The next window that appears displays a table on the bottom. Within this table you will see the product called “C4ISRDataOntology-01A01-U-v2.0.0”. This is the product that needs to be downloaded. In the first column next to this product, click the button that says “**Download.**”
- A popup will indicate that you do not have permission to download the requested product. Click “**OK**” to Request Permission. Enter your purpose for obtaining the Ontology and what program it will be supporting.
- This next request step requires a second manual administrative approval.

Step Three: Download the C4ISR Data Ontology

This last step deals with downloading and accessing the C4ISR Data Ontology Package. The steps required to accomplish this are as follows.

- After the last bullet in Step Two is completed, you will receive another email indicating your approval along with a new password, and a link back to the download site. The new password that you receive is needed to decrypt and install the C4ISR Data Ontology Package once it is downloaded.
- Click on the link within the email that states “**Click To Register Software.**”
- On the Window that appears, at the bottom, click on the button called “Register Software.”
- The next window that will appear is called “Software Download/Order Menu.” Click the button in the center of the screen that says “**Download Software.**”
- On the next screen you will see a dropdown menu called “Category.” In this drop down list select “**DID Software.**”
- Once this is done, under the title called “Sub-Categories” you will see highlighted in blue “**Ontology.**” Click on this link.
- The next window that appears displays a table on the bottom. Within this table you will see the product called “C4ISRDataOntology-01A01-U-v2.0.0” This is the product that needs to be downloaded. In the first column next to this product, click the button that says “**Download.**”
- A popup window will appear that contains directions for how to download the package. On this pop-up is a button called “**Download Now.**” Click on it.
- The password you were emailed to un-encrypt the download package will appear. At this point, one of two things will happen:
 - If you do not have pop-blocker active, go to the next bullet where you are prompted to run or save the file.
 - If you have pop-blocker active, in order to download the package, go to the top left-hand side of this window and right click on the mouse. The option to down-load the file will appear. Select his option from the small menu.
- You will then be prompted to run or save the file. Choose Save.

C4ISR DATA ONTOLOGY DOWNLOAD INSTRUCTIONS

- Select the place on your PC where you will like to save the package and click ***“Save.”***
- Once the download is completed, find the executable package on your PC. Click on it.
- An installer will appear. When you first start to go through the installer, you will be prompted for your password. Enter the password that was emailed to you to un-encrypt the package.
- Once you enter your password, continue to go through the installer. You will then be prompted to enter the location for where you would like the package to be installed. Enter or choose the destination of the package, and then continue with the installer.
- Once the installer is completed, find the package that was just installed on your PC.
- Once the package is located (C4ISRDataOntology_v2.0.0), go to the sub-folder called “Ontology Version 2.0.0.”
- Within that folder is a file called ***“README.”*** Open that file (using Notepad) and follow the instructions given to install Protégé 2000 and to access the C4ISR Data Ontology.
